Besondere Hinweise: Ertragspoolung zur Risikostreuung

Beim vorliegenden „Pool Radlinghausen“ handelt es sich um drei eigenständige Betreibergesellschaften. Zum Ausgleich möglicher Ertragsunterschiede zwischen ihren benachbarten Standorten sowie zur Streuung der Betriebsrisiken haben sie sich entschlossen, ihre Stromerträge zu „poolen“. Das bedeutet, dass die Einzelerträge der Anlagen zusammengerechnet und anschließend der Durchschnittsertrag den beteiligten Gesellschaften wieder zugewiesen wird. Hierdurch werden Ertragsschwankungen ausgeglichen. Der Poolertrag entspricht zugleich dem Wert, der bei Projekten mit Bürgerbeteiligung im Prospekt dargestellt wurde. Er ist auf der letzten Seite dieses PDFs separat dargestellt!
